What is KUNA Pay?

KUNA Pay is the crypto acquiring platform that allow you to:

- ☑ Accept crypto and get paid in fiat
- ☑ Manage all crypto flows in one place
- ☑ Increase and track revenue from crypto
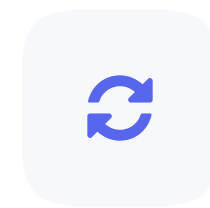

Solutions for Blockhain Data Platforms

API Gateway

Use Reach API to accept crypto and manage income in merchant portal.

Invoice Management

Your offline business still gets the crypto payments; create the invoice simply in the merchant dashboard.

Auto-Conversion

You do not need to keep a pulse on crypto volatility; instant currency exchange handles it for you.

Human Checkout

Your buyers can use nearly 20 cryptocurrencies to pay for the product or service.

Role Based Multi Account Access

Invite as many team members as you need, and set the permissions to control the accesses.

Turnover Management

You receive the payment quickly and can send money both to your crypto wallets and bank accounts.

AML/KYC

All transactions are verified and checked with Chainanalysis, so no suspicious transaction would ever go to your wallet.

Settlement & Reporting

We provide settlement and statement reports, so you can quickly load them and share them with your bank.

KUNA Pay

Competitors are good but why KUNA Pay is better

- ✅ Transparent pricing
- ✅ No monthly and setup fees
- ✅ No hidden conversion fees
- ✅ Easy onboarding
- ✅ Single integration and assistance
- ✅ Automated currency conversion capabilities
- ✅ Fast and flexible withdrawal processing
- ✅ Volatility risk mitigation tools

❌ Not clear how much need to pay in the selected currency. USDT is unavailable.

Flexible payments

You can set the maximum under and overpayment allowed from your customers due to crypto volatility. The more restrictive of the two thresholds will be applied for each payment. Your customers will not use these thresholds.

Underpayment threshold
Select how far under the price you are willing to go before rejecting the payment.

Absolute
Example: Set $0.10 if you are willing to accept a $9.90 payment for a $10.00 item.   5 USD 🗑

Relative
Example: Set 1% if you are willing to accept a $99 for a $100 item.   0.5 % 🗑

Overpayment threshold
Select how far over the price you are willing to go before rejecting the payment.

Absolute
Example: Set $0.10 if you are willing to accept a $10.10 payment for a $10.00 item.   5 USD 🗑

Relative
Example: Set 1% if you are willing to accept a $101 payment for a $100 item.   0.5 % 🗑

❌ You can't adjust exchange rates to mitigate volatility.
